

From Today's Windsor Star:

Get behind bridge enhancement plan

By Ken Thompson, Windsor Star October 5, 2010

Now that it appears that the state of Michigan is not going to get on the bandwagon with regards to the DRIC bridge, the time has come to get behind the Ambassador Bridge Enhancement Project.

Shovel ready, will employ thousands immediately, no cost to the taxpayers, a major boost to the economy of the area and heaven knows we need that.

I am certain that the Moroun family would even build a tourist information booth on the Canadian side as part of the project.

The actual building of the bridge will become a tourist attraction during construction as was the twinning of the Blue Water Bridge in Point Edward. It constantly drew a crowd.

The time has come. Let's all get behind this program and get some life back in the area. Our future depends on it.

KEN THOMPSON, LaSalle
