For Immediate Release

WARREN - Today, Detroit International Bridge Company President Dan Stamper released the following statement regarding completion of the Gateway Project.

“The Detroit International Bridge Company joins with Lieutenant Governor Calley and Michigan state highway officials in celebrating the completion of the direct highway to bridge connections. The net benefit of speed and capacity to the Ambassador Bridge is an important outcome for the people, passengers and freight that utilize this vital economic artery.

“Today is a day of celebration. While we will not thank the government for their efforts to damage our business during this project, the final completion of the highway ramp connections deserves a champagne toast. Like the re-decking project that was finished in the spring, and the many other major investments by the Ambassador Bridge in its facilities, these new ramps will ensure the Ambassador Bridge remains North America’s number one border crossing.”
